The Puget Sound Chapter of AESS presents *An introduction to DOORS*

Ms Michele Mikalski—Boeing
6pm (light refreshments) for 6:30-7:30pm, Wednesday, July 9, 2008
(venue details over)

Managing project requirements is one of the most important jobs that a company performs. This presentation introduces the Telelogic Dynamic Object Oriented Requirements System (DOORS) application for managing requirements. The main emphasis of the presentation will be on defining an Enterprise solution for DOORS. Reducing costs, schedule and successfully implementing an application is also covered in the presentation.

To attend, **please RSVP no later than 8 July 2008** to Reece Lumsden at reece.h.lumsden@boeing.com

Speaker Bio: Michele Michalski received her B.S. in Electrical Engineering from Milwaukee School of Engineering in 1982. She worked for Westinghouse for 10 years after college working on Defense weapon systems and fire control systems. For the next 10 years she ran a successful Engineering consulting company with clients ranging from U.S. government armed services to banks and insurance companies. Currently she works for The Boeing Company as the Engineering Technical Lead for the DOORS Program office. She specializes in systems engineering requirements management, metrics and the Telelogic DOORS application.
